

REMARKS

Supplemental to the Amendment filed February 28, 2008, Applicants request reconsideration of this application as presently amended.

All the comments in the Amendment filed February 28, 2008 are still relevant and therefore incorporated herein by reference.

The present Supplemental Amendment has been filed in light of the interview held with the undersigned and the Examiner on March 14, 2008. During the interview, it was agreed that the independent claim would be amended to clarify that a power output of the another power production facility would be adjusted and applied to the transmission lines so as to compensate for a deviation from the threshold by the renewable power production facility. Moreover, a result in total power produced by the renewable power production facility or by the another power production facility on behalf of the renewable power production facility will be approximately the same as the threshold.

In light of the discussion and agreement during the interview, independent Claim 15 has been amended consistent with what was discussed in the interview. Applicants therefore respectfully request reconsideration of this application in view of the presently amended claims.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
